

PRIME SPECIALITY PACKAGING

Products Catalogue

Website

FLOOR MARKING TAPES

- Uniform thickness and width throughout the length.
- Better performance compares to paints.
- It resists water, weather, acids, alkalies, oil, greases, and gasoline.
- Free from wrinkles and Air Bubbles making it easy to apply uniformly without distortion and frayed edges. Special dispensers are available.
- Colour Available: Red, White, Yellow, Green, Blue, Black & Yellow/Black.

DUCT & BOOK BINDING TAPES

- Originally developed for Heating, Ventilating and Air Conditioning (HVAC) Applications.
- Ideal for insulation, underground pipeline, corrosion & abrasion protection.
- Good resistance to moisture, and humidity.
- Possessing outstanding conformity.
- It is designed for industrial or pipe wrapping.
- Colors available: Black, Red, Silver Grey & many more.

FILAMENT TAPES

- A self-adhesive Tape which has been specially designed for applications require a high breaking strength.
- This tape has a film backing and Hotmelt adhesive.
- Woven glass fibres reinforce the backing, making this product extremely strong when used for heavy packing where it can replace metal and polypropylene strapping to great advantage.

DOUBLE SIDED FOAM TAPES

- Various grades are available for a wide range of bonding applications.
- Tape with both side adhesive coating suitable for wall mount pictures, cable tie-mounts, and multi-applications.
- Suitable for clean and smooth walls, ceramic tiles, and wooden surfaces.
- Tailor-made shapes are available.

REINFORCED PAPER TAPES

- Lamination with fibreglass and yarns specially for reinforced purpose. Very high tensile strength.
- This type with fibreglass backing is designed for heavy packaging in economical way.
- High adhesion.
- Good packaging results.
- High resistance to abrasion while transporting.
- Recommended for export packing.
- Brown colour available.
- Environment friendly and temper proof.
- Printed version also available.

KRAFT PAPERS TAPES

- Strong adhesive ability.
- Good performance in re - stripping & packaging.
- Recommended for export packing.
- Environment friendly.

D/S POLYESTER TAPES

- Self-adhesive tape consisting of a PET backing and a modified Hotmelt adhesive with transparent Paper Liner.
- High Bond Tape used in many applications required high tensile strength and long term ageing.
- This tape provides a strong rigid bond for the most demanding external applications.
- It is excellent for bonding rigid extrusions and is ideal for applications requiring an almost transparent finish.
- Most suitable for fixing of reflection foil to LCD frame.

MASKING TAPES

- High performance Multipurpose Masking Tape.
- Resistant to strong solvents and paints.
- Good holding power.
- Excellent for many individual applications.
- Will not tear while removing.
- No adhesive transfer after removal.

SURFACE PROTECTION & FLOOR GUARD TAPES

- It is used for the protection of surfaces finishes from dirt, scratches and tool marks during handling, transport, storage, forming, assembly etc.
- It can be used to protect glossy or semi glossy materials, such as pre painted metal, acrylic sheets, polycarbonate, polystyrene, rigid PVC, cold stainless steel, decorative laminates, non-anodized aluminium & car bodies.
- The film can also be printed.

ALUMINIUM FOIL TAPES

- For general purpose seaming, patching and sealing.
- Highly suitable for sealing off air conditioning and cool/warm air flow ducting.
- Excellent adhesion on dry/clean surfaces on metal and other surfaces.
- These foil tapes can be applied for both high and low temperatures.
- Size as per requirement.

BOPP TAPES (PLAIN/PRINTED/COLOURED)

- BOPP Film coated with water base adhesive.
- Printed of single and multiple colours is also possible with logo or customized design.
- Printed with company's logo, it is a self-promotion display platform for enterprise.
- It is very good for carton box sealing.
- Best option to go for branding purpose.
- Provides packaging and seating solution for both domestic and industrial needs.

HDPE WOVEN SACK TAPES

- HDPE tape are used in Joint jobs in the connected industries and where HDPE fabric and bags are used
- Heavy duty, water resistance packing tape made from HDPE fabric.
- High tensile strength, strong adhesion & surfaces adhesion.
- For packaging, sealing, jointing, reinforcement, patching of HDPE bags / cartons, wire / rope bonding, etc.
- Available in various colours

DOUBLE SIDED FILAMENT TAPES

- Double-sided filament tape is composed of a release liner, cross-fiberglass filament and hot-melt pressure-sensitive adhesive.
- It features excellent permanent adhesion to EPDM rubber and foam PU strips.
- Its cross-fiberglass layer plays significant roles like keeping size stable and making the tape very high in strength in both cross and machine directions.
- Tough film backing protects the filaments and adhesive to provide longer functional tape performance.
- Used for Door & window sealing strip, bags & suitcase lining sealing strap, for fixing carpet.

DOUBLE SIDED CLOTH TAPE

- Double-Sided Cloth Tape is a reliable, high shear resistant, double-sided fabric tape coated with rubber adhesive.
- It has a Paper & polyester liner which unwinds smoothly and ensures easy release.
- Easily bonds glass, wood, steel, foam, etc.
- Mounting of rubber stereotypes in flexographic printing.
- Comes with Rubber adhesive and Hot melt adhesive.
- Used for Affixing of carpets, Etc.

SINGLE SIDED POLYESTER TAPE

- Single Sided Polyester Tape Hot Melt BOPP self adhesive tape is high quality application tape with specially formulated adhesive.
- Single sided polyester tape will deliver high bonding tack, uniform & enhanced safe, permanent seal, which also ensures tamper proof & security protection to the applied item.
- Having good resistance to humidity, it also has a longer shelf life.
- Used in Sea Transport Heavy Carton Sealing.

FIBERGLASS MESH TAPE

- Self-Adhesive Fiberglass Mesh Tape, made with 8 x 8 mesh (3.2 x 3.2mm spacing), coated with excellent water-based acrylic adhesive.
- Self-adhesive, faster application, no pre-plastering required, easy to apply, resists cracking, do no rot, no blisters or bubbles, more environmentally-friendly job.
- It won't tear, shrink, stretch or bubble, and it hides joints, cracks and holes permanently.
- Used in any commercial or residential application of repairing the cracks and joints or holes of drywall & plasterboard & stucco and the other surface.

PP STRAPS

- These straps are available in 5 - 19 mm widths.
- They are eco friendly, safe for use with food.
- The standard color is white, but other colors and sizes can be produced in the same grade on request.
- They are manufactured through the most sophisticated, hi-tech fully automatic plant.
- They perform smooth and trouble free running on fully automatic machines even at very high speed Packing operations.

PET STRAPS

- These straps are available in 9-32 mm widths in high and medium strength grades.
- Made from 100% recycled material.
- The straps are temperature stable & guarantee high strength and elasticity for optimally securing loads.
- Suitable for use with machines and manua strapping.
- Used for strapping stacks of paper & corrugated board and also for entire pallets with more solid loads, including , bricks, wood or cans.
- Suitable for both heat welding and ultra sonic sealing process.

STRAPPING MACHINES

High-performance polypropylene and polyester straps, tools, semi-automatic and automatic power strapping machines are the most efficient system for closure, reinforcement, baling, bundling and unitizing. Ensuring uniform strap placement and load integrity for low, medium and high speed production applications, they protect products from the hazards of transportation and storage. The strapping tools and machines can be integrated into new and existing production lines and are operator and maintenance friendly.

SEMI AUTOMATIC

- Semiautomatic general-purpose strapping machine.
- High speed, maintenance-free, jam-resistant.
- Uses polypropylene strapping.

AUTOMATIC

- Automatic heavy-duty, general-purpose plastic strapping machine for 9 and 19 mm polypropylene strapping.
- High-speed, jam-resistant, optional patented automatic cutoff and re-feed feature.

FULLY AUTOMATIC

- The head is used in fully automatic strapping installations and it is suitable for a variety of applications in the steel, non ferrous, brick, block, panel and general packaging industries.
- Strapping head designed to be used in combination with various polypropylene strap types and sizes ranging from 9 to 15 mm.

CARTON SEALING MACHINE

- The carton to be sealed is put on the in-feed rollers given a gentle push, when the motorized conveyor takes over starts pulling the carton forward.
- Top Bottom flaps of the cartons simultaneously along with rollers pressing the tape for a tight seal.
- When the taping is over, the cutter blades cut-off the tape the sealed cartons pass through to the out-feed rollers for delivery.

ALSO AVAILABLE

- Acrylic foam tapes (various types)
- Heat sealing tapes
- Teflon cloth tapes
- DS polyester tapes (various types)
- Gasket tapes (black & white foam)
- Single side foam tapes
- Spacer tapes
- Super clear bopp tapes for lamination

We are Having Latest Technology Imported Confecting Machines For Superior Finish of Tapes
